Career Objective

Full-Stack Developer skilled in the **MERN stack (MongoDB, Express.js, React, Node.js)** with experience in **React Router, Redux Toolkit, RTK Query, and TypeScript**. Adept at building modern, scalable web applications with responsive frontends and secure, high-performance backends. Seeking an entry-level role to contribute to innovative projects, write clean, maintainable code, and continuously grow technical expertise.

Skills

Backend - Node.js, Express, MongoDB, TypeScript, JWT, RESTful API Development.

Frontend - React, Redux Toolkit, React Router, TypeScript, React Hook Form.

Tools - VS Code, Figma, Vercel, Netlify, Cloudinary, Postman.

Soft Skills - Problem Solving, Critical Thinking, Communication and Collaboration.

Projects

E-Wallet - Digital Wallet Management System

Tech Stack: React, React Router, Redux Toolkit, RTK Query, TypeScript, Express, MongoDB.

Overview: Secure, responsive digital wallet for managing funds and tracking transactions.

Key Features:

- Role-Based Navigation - Dynamic menus for Users, Agents and Admins.
- Transaction Management - Deposit, withdraw, send money and handle cash-in/out.
- Wallet Management - Real-time balance, quick actions and profile updates.

Impact: Improved transaction efficiency by 40% and enhanced user security by 35%.
